PREFACE

Crime in Illinois 1985 is the fourteenth annual compilation of state crime statistics published by the Department of State Police. Readers will notice two significant changes from last year's edition.

Statistics from the City of Chicago are now recorded with the rest of the state's data since the problems that led to their previous omission have been resolved.

The category of rape has been changed to criminal sexual assault. Since July of 1984, sex crimes committed in Illinois have been governed by P.A. 83-1067, the "Illinois Criminal Sexual Assault Act." This law created new offense codes which were implemented January 1, 1985. Because the new law encompasses more offenses than the category of rape, comparisons between the two are impossible. Thus, we cannot record the percentage of change, increase or decrease between 1984 and 1985. Comparison figures will be presented in the next publication of *Crime in Illinois*.

This publication is one of the products of the Uniform Crime Reporting Program, which entails the submission of data by law enforcement agencies throughout the state. When correlated and analyzed, the statistics constitute a useful body of knowledge that can significantly contribute to management and planning activities at local, state, and federal levels.

Since its inception, the quality and scope of the Uniform Crime Reporting Program have increased, thanks to the dedication and cooperation of each participating agency. I am confident the trend will continue.

With gratitude to all who have contributed to its publication, I present *Crime in Illinois 1985* to the people of Illinois.

INTRODUCTION

INTRODUCTION

THE ILLINOIS UNIFORM CRIME REPORTING PROGRAM

The Illinois Uniform Crime Reporting (I-UCR) Program was developed in 1971 and implemented on January 1, 1972. The I-UCR Program has evolved into a system intended to meet the needs of all reporting agencies. It is an incident-based reporting system designed to accomplish the following major goals:

- To provide needed administrative statistics for law enforcement agencies.
- To provide the legislature with information necessary to formulate effective laws which address the crime problem.
- To provide Illinois citizens with the most complete information on the nature and extent of crime.
- To include comprehensive data for researchers and planners.
- To adhere to the national program's standards.

Reporting crime statistics is mandated by chapter 38, section 206-8 of the *Illinois Revised Statutes:*

> *206-8. Crime Statistics.8. The Department (of State Police) shall be a central repository and custodian of crime statistics for the state and it shall have all power incident thereto to carry out the purposes of this Act, including the power to demand and receive cooperation in the submission of crime statistics from all units of government.*

Reporting agencies receive monthly and quarterly summaries of the reported criminal activity within their jurisdictions upon request. All offenses known to law enforcement agencies are reported monthly to the Crime Studies Section of the Bureau of Identification. Participating jurisdictions include villages, municipalities, counties, colleges, universities, park districts, railroads and hospitals throughout Illinois. Agencies may also submit service code and local ordinance data in order to provide law enforcement administrators with information for use in planning and research, determining and utilizing manpower, budgeting, and developing and evaluating crime prevention programs.

In 1985, there were 1,001 law enforcement agencies in Illinois, 741 of which reported crime statistics directly to the Bureau of Identification. The remaining agencies reported their crime statistics through an intermediary agency (sheriff's office, police department, etc.). Agencies submit their data through the use of source documents, printouts, magnetic tape, or via remote on-line terminals.

CONSIDERATIONS FOR INTERPRETATION

When comparing the crime statistics of one agency with another, many factors should be taken into consideration before conclusions are made. Some of the conditions affecting the type and volume of crime are:

- Density and size of the community population and the metropolitan area of which it is a part.
- Composition of the population with reference particularly to age, sex, and race.
- Economic status and mores of the population.
- Stability of population, including commuters, seasonal workers, and other transient types.
- Climate, including seasonal weather conditions.
- Educational, recreational, and religious characteristics.
- Effective strength of the police force.
- Standards of appointments to the local police force.
- Policies of local officials.
- Attitudes and policies of the courts and corrections.
- Attitudes of the public toward law enforcement problems.
- Administrative and investigative efficiency of law enforcement, including the degree of adherence of crime reporting and standards.
- Organization and cooperation of adjoining and overlapping police jurisdictions.[1]

THE REPORTING OF RAPE AND ILLINOIS CRIMINAL SEXUAL ASSAULT ACT OFFENSES

Effective July 1, 1984, sex crimes committed in Illinois were governed by a new statute entitled "Illinois Criminal Sexual Assault Act" (P.A. 83-1067). This statute repealed eight existing laws in Illinois including rape.

The criminal sexual assault/rape statistics presented in *Crime in Illinois 1985* reflect offenses and arrests reported as rape during January - June 1984, and offenses and arrests reported as criminal sexual assault during July - December 1984 and January - December 1985.

Law enforcement agencies reported July - December 1984 criminal sexual assault offenses to the I-UCR Program using the following conversion table. New offense codes and classifications for 1985 were implemented on January 1, 1985, and are reflected in this publication.

Likewise, attempted aggravated criminal sexual assault offenses with any other dangerous weapon or with any of the following aggravating circumstances present were reported under I-UCR Offense Code 022D.

Examples of aggravated criminal sexual assault offenses:

THE CRIME INDEX

The Crime Index is the total number of index offenses occurring within a given jurisdiction during a specified period of time. It is used to indicate the amount and extent of serious crimes as defined by the International Association of Chiefs of Police Committee on Uniform Crime Reports. The Crime Index consists of violent crimes — murder and voluntary manslaughter; forcible rape; robbery; and aggravated assault, aggravated battery, and attempted murder, and of property crimes — burglary, theft, motor vehicle theft, and arson.

The index crimes used by the I-UCR Program translate into the national program's eight Crime Index offenses as:

Violent Crimes

Murder and voluntary manslaughter — The willful killing of a person or the death of a person caused by gross negligence of an individual other than the victim.

Forcible rape — The carnal knowledge of a female, forcibly and against her will; includes attempted rape. Illinois reports criminal sexual assault offenses rather than rape offenses under this category.

Robbery — The taking or attempting to take anything of value from the care, custody, or control of a person or persons by force or threat of force or violence; includes attempted robbery.

Aggravated assault — The intentional causing of serious bodily harm or the intentional attempt or threat of serious bodily injury or death; includes aggravated battery and attempted murder.

Property Crimes

Burglary — The unlawful entry of a structure to commit a felony or theft; includes attempted burglary.

Theft — The unlawful taking or stealing of property or articles without the use of force, violence, or fraud; includes burglary from motor vehicle and attempts.

Motor vehicle theft — The unlawful taking or stealing of a motor vehicle; includes attempted motor vehicle theft.

Arson — The willful or malicious burning or attempts to burn, with or without intent to defraud, a dwelling house, public building or any building, motor vehicle, aircraft, or personal property of another.

THE CRIME RATE

The crime rate indicates the volume of crime occurring within a given population. It is defined as the total number of index crimes per 100,000 inhabitants and is calculated as follows:

$$\frac{\text{Crime Index} \times 100{,}000}{\text{jurisdictional population}} = \text{crime rate}$$

The jurisdictional population can be that of a city, town, village, state, or nation.

* 1983 and January — June 1984 statistics reflect offenses reported as forcible rape.

All totals shown for each category of offense and arrest information reflect data reported by sheriffs' offices, police departments, colleges, universities, and the Secretary of State's Office on offenses that occurred between January 1, 1985, and December 31, 1985. Because of agency adjustments and late submissions, 1984 figures reflected in this publication are not comparable with those figures published in *Crime in Illinois 1984*.

Chicago Police Department statistics are included in the state totals presented in Crime in Illinois 1985. In Crime in Illinois' 1982, 1983 and 1984, Chicago Police Department statistics were published in a separate section and not included in state totals.

MURDER AND VOLUNTARY MANSLAUGHTER

The index offenses of murder and voluntary manslaughter are merged in accordance with the national program definition and are based solely on police investigation.

Murder

38 § 9-1.

(a) A person who kills an individual without lawful justification commits murder if, in performing the acts which cause the death:

- *(1) He either intends to kill or do great bodily harm to that individual or another, or knows that such acts will cause death to that individual or another; or*
- *(2) He knows that such acts create a strong probability of death or great bodily harm to that individual or another; or*
- *(3) He is attempting or committing a forcible felony other than voluntary manslaughter.*

Voluntary manslaughter

38 § 9-2.

(a) A person who kills an individual without lawful justification commits voluntary manslaughter if at the time of the killing he is acting under a sudden and intense passion resulting from serious provocation by:

- *(1) The individual killed; or*
- *(2) Another whom the offender endeavors to kill, but he negligently or accidentally causes the death of the individual killed.*

  Serious provocation is conduct sufficient to excite an intense passion in a reasonable person.

(b) A person who intentionally or knowingly kills an individual commits voluntary manslaughter if at the time of killing he believes the circumstances to be such that, if they existed, would justify or exonerate the killing under the principles stated in chapter 38, article 7, Illinois Revised Statutes, *but his belief is unreasonable.*

CRIME INDEX/CRIME RATE DATA

CRIME INDEX/CRIME RATE DATA

Caution should be exercised when reviewing and using these data. The many social factors related to crime and a community's residential population — used to calculate the crime rate — must be considered when making statistical comparisons. A community may have a small residential population but a large moving population because of a substantial number of manufacturers, motels, etc., within its jurisdiction. The large moving population attracts criminal behavior that occurs within the small jurisdiction and must be reported by the law enforcement agency. The crime rate calculation does not compensate for a moving population. The statistics can make it appear that crimes are committed by community residents when this is not necessarily true.

BUREAU OF THE CENSUS

STANDARD METROPOLITAN STATISTICAL AREAS

A Standard Metropolitan Statistical Area (SMSA) includes a city of more than 50,000 and the county in which the city is located, plus other cities which exhibit strong ties with the city. The county sheriff's office is also included for crime reporting purposes.* Two of the SMSAs overlap with Iowa and Missouri. Areas outside of Illinois that are included in an SMSA are not represented in the statistics presented here.

SMSA Summary

The estimated population of core cities and suburban areas — the two regions that comprise the SMSAs — accounts for 81.0 percent of the state population. The total SMSA index crimes account for 91.7 percent of the Illinois Crime Index.

SMSA Core Summary

A core city is within an SMSA and has a population of 50,000 or more inhabitants. The "twin central cities" of certain SMSAs have combined populations of 50,000 or more inhabitants and are considered together as a core city.*

The inhabitants of core cities represent 40.5 percent of the state's population and 50.0 percent of the SMSAs' population. Core cities account for 63.1 percent of the Illinois index crimes and 68.7 percent of the total SMSA index crimes.

SMSA Suburban Summary

A suburban area consists of cities and towns with 50,000 or less population, including the counties which are within the SMSA. The county sheriff's office is included in the suburban area.*

Suburban areas lie outside core cities and are bounded by the SMSA lines. The inhabitants of suburban areas represent 40.5 percent of the state's population and 50.0 percent of the SMSAs' population. LAW ENFORCEMENT OFFICERS KILLED

During 1985, three Illinois law enforcement officers were killed by felonious acts. A brief narrative on the circumstances surrounding each felonious death is presented below:

July

Chicago - On July 12, 1985, at approximately 4:10 p.m., two police officers with the Chicago Police Department responded to a call that a male wanted for both impersonating a police officer and posing as a city building inspector in an alleged shakedown scam had just left a local business. When the suspect observed the police officers, he fled on foot and was pursued by one of the officers. While apprehending the 37-year-old subject, a struggle ensued and the 22-year veteran officer was shot three times with his .38-caliber service revolver. The 53-year-old officer sustained fatal wounds to the chest and abdomen and died a short time later. The assailant, apprehended near the scene of the shooting by other officers, has been charged with murder.

October

Cook County - A 29-year-old officer with the Cook County Sheriff's Office stopped a vehicle without license plates at approximately 9:30 a.m. on October 17, 1985. After calling for backup, the 5-year veteran directed three suspects out of the vehicle. The officer noticed a .38-caliber weapon on one suspect and attempted to disarm him when the assailant fired one shot striking the victim in the forehead killing him instantly. Responding officers broadcasted a description of the vehicle and the perpetrators, ages 27, 23 and 22, were apprehended. One suspect has been charged with murder.

November

Wheeling - A 41-year-old officer with the Wheeling Police Department responded to a possible unlawful entry at a private residence at approximately 7:30 p.m. on November 5, 1985. The 15-year veteran immediately requested a backup unit since he held two suspects in custody. The suspects shot and killed the victim with a .38-caliber handgun and engaged the backup officer in a gun battle before fleeing the scene in a vehicle with three hostages. The suspects were apprehended and charged with murder, three counts of aggravated kidnapping, and attempted murder.

LAW ENFORCEMENT EMPLOYMENT INFORMATION

The employment rate for law enforcement personnel is calculated as follows:

$$\frac{\text{number of employees} \times 1{,}000}{\text{jurisdictional population}} = \text{employment rate}$$

Example:

A department with 60 employees in a population of 51,000 has an employment rate of 1.2 per 1,000 inhabitants.

$$\frac{60 \times 1{,}000}{51{,}000} = 1.2 \text{ per } 1{,}000 \text{ inhabitants}$$

Law enforcement employment rates should not be correlated with index crimes; non-index offenses and the many services performed by the typical law enforcement officer amount to over 80 percent of the officer's workload, the details of which usually remain unpublished. Each community should consider all the factors related to the causes of crime and determine the role of the law enforcement department relative to crime and to required services.

The 25,042 part- and full-time sworn officers in 1985 account for 83.9 percent of the police department work force. The 1985 employment rate for sworn employees of police departments is 2.7 per 1,000 inhabitants. The 4,810 civilian employees comprise 16.1 percent of the police department work force, with an employment rate of .5 per 1,000 inhabitants.

The 3,097 part- and full-time sworn officers in 1985 account for 70.7 percent of the sheriffs' offices work force. The 1985 employment rate for sworn employees of sheriffs' office is 1.4 per 1,000 inhabitants. The 1,284 civilian employees comprise 29.3 percent of the sheriffs' offices work force, with an employment rate of .6 per 1,000 inhabitants.

PREFACE

Crime in Illinois, 1986 marks the fifteenth year that the Illinois State Police has compiled and published annual crime statistics for the state. The publication is one of the products of the Uniform Crime Reporting Program, which entails the submission of data by law enforcement agencies throughout the state. When correlated and analyzed, the statistics constitute a useful body of knowledge that can significantly contribute to management and planning activities at local, state, and federal levels.

Each year, the quality and scope of the Uniform Crime Reporting Program have increased, thanks to the cooperation and dedication of each participating agency. I am confident that the trend will continue.

With appreciation and thanks to all who have contributed to its publication, I present *Crime in Illinois, 1986* to the people of Illinois.

INTRODUCTION

INTRODUCTION

THE ILLINOIS UNIFORM CRIME REPORTING PROGRAM

The Illinois Uniform Crime Reporting (I-UCR) Program was developed in 1971 and implemented on January 1, 1972. The I-UCR Program has evolved into a system intended to meet the needs of all reporting agencies. It is an incident-based reporting system designed to accomplish the following major goals:

- To provide needed administrative statistics for law enforcement agencies.
- To provide the legislature with information necessary to formulate effective laws which address the crime problem.
- To provide Illinois citizens with the most complete information on the nature and extent of crime.
- To include comprehensive data for researchers and planners.
- To adhere to the national program's standards.

Reporting crime statistics is mandated by chapter 38, paragraph 206-8 of the *Illinois Revised Statutes:*

> *206-8. Crime Statistics.8. The Department (of State Police) shall be a central repository and custodian of crime statistics for the state and it shall have all power incident thereto to carry out the purposes of this Act, including the power to demand and receive cooperation in the submission of crime statistics from all units of government.*

Reporting agencies receive monthly and quarterly summaries of the reported criminal activity within their jurisdictions upon request. All offenses known to law enforcement agencies are reported monthly to the Crime Studies Section of the Bureau of Identification. Participating jurisdictions include villages, municipalities, counties, colleges, universities, park districts, railroads, and hospitals throughout Illinois. Agencies may also submit service code and local ordinance data in order to provide law enforcement administrators with information for use in planning and research, determining and utilizing manpower, budgeting, and developing and evaluating crime prevention programs.

In 1986, there were 1,010 law enforcement agencies in Illinois, 751 of which reported crime statistics directly to the Bureau of Identification. The remaining agencies reported their crime statistics through an intermediary agency (sheriff's office, police department, etc.). Agencies submit their data through the use of paper forms, computer printouts, magnetic tape, floppy disk, or via remote on-line terminals.

CONSIDERATIONS FOR INTERPRETATION

When comparing the crime statistics of one agency with another, many factors should be taken into consideration before conclusions are made. Some of the conditions affecting the type and volume of crime are:

- Density and size of the community population and the metropolitan area of which it is a part.
- Composition of the population with reference particularly to age, sex, and race.
- Economic status and mores of the population.
- Stability of population, including commuters, seasonal workers, and other transient types.
- Climate, including seasonal weather conditions.
- Educational, recreational, and religious characteristics.
- Effective strength of the police force.
- Standards of appointments to the local police force.
- Policies of local officials.
- Attitudes and policies of the courts and corrections.
- Attitudes of the public toward law enforcement problems.
- Administrative and investigative efficiency of law enforcement, including the degree of adherence of crime reporting and standards.
- Organization and cooperation of adjoining and overlapping police jurisdictions.[1]

THE CRIME INDEX

The Crime Index is the total number of index offenses occurring within a given jurisdiction during a specified period of time. It is used to indicate the amount and extent of serious crimes as defined by the International Association of Chiefs of Police Committee on Uniform Crime Reports. The Crime Index consists of violent crimes — murder and voluntary manslaughter; forcible rape; robbery; and aggravated assault, aggravated battery, and attempted murder, and of property crimes — burglary, theft, motor vehicle theft, and arson.

The index crimes used by the I-UCR Program translate into the national program's eight Crime Index offenses as:

Violent Crimes

Murder and voluntary manslaughter — The willful killing of a person or the death of a person caused by gross negligence of an individual other than the victim.

Forcible rape — The carnal knowledge of a female, forcibly and against her will; includes attempted rape. Illinois reports criminal sexual assault offenses rather than rape offenses under this category.

Robbery — The taking or attempting to take anything of value from the care, custody, or control of a person or persons by force or threat of force or violence; includes attempted robbery.

Aggravated assault — The intentional causing of serious bodily harm or the intentional attempt or threat of serious bodily injury or death; includes aggravated battery and attempted murder.

Property Crimes

Burglary — The unlawful entry of a structure to commit a felony or theft; includes attempted burglary.

Theft — The unlawful taking or stealing of property or articles without the use of force, violence, or fraud; includes burglary from motor vehicle and attempts.

Motor vehicle theft — The unlawful taking or stealing of a motor vehicle; includes attempted motor vehicle theft.

Arson — The willful or malicious burning or attempts to burn, with or without intent to defraud, a dwelling house, public building or any building, motor vehicle, aircraft, or personal property of another.

THE CRIME RATE

The crime rate indicates the volume of crime occurring within a given population. It is defined as the total number of index crimes per 100,000 inhabitants and is calculated as follows:

$$\frac{\text{Crime Index} \times 100{,}000}{\text{jurisdictional population}} = \text{crime rate}$$

The jurisdictional population can be that of a city, town, village, state, or nation.

*January - June 1984 statistics reflect offenses reported as forcible rape.

All totals shown for each category of offense and arrest information reflect data reported by sheriffs' offices, police departments, colleges, universities, and the Secretary of State's Office on offenses that occurred between January 1, 1986, and December 31, 1986. Because of agency adjustments and late submissions, 1985 figures reflected in this publication are not comparable with those figures published in *Crime in Illinois 1985*.

MURDER AND VOLUNTARY MANSLAUGHTER

The index offenses of murder and voluntary manslaughter are merged in accordance with the national program definition and are based solely on police investigation.

Murder

38 § 9-1.

(a) A person who kills an individual without lawful justification commits murder if, in performing the acts which cause the death:

- *(1) He either intends to kill or do great bodily harm to that individual or another, or knows that such acts will cause death to that individual or another; or*
- *(2) He knows that such acts create a strong probability of death or great bodily harm to that individual or another; or*
- *(3) He is attempting or committing a forcible felony other than voluntary manslaughter.*

Voluntary manslaughter

38 § 9-2.

(a) A person who kills an individual without lawful justification commits voluntary manslaughter if at the time of the killing he is acting under a sudden and intense passion resulting from serious provocation by:

- *(1) The individual killed; or*
- *(2) Another whom the offender endeavors to kill, but he negligently or accidentally causes the death of the individual killed.*

Serious provocation is conduct sufficient to excite an intense passion in a reasonable person.

(b) A person who intentionally or knowingly kills an individual commits voluntary manslaughter if at the time of the killing he believes the circumstances to be such that, if they existed, would justify or exonerate the killing under the principles stated in chapter 38, article 7, Illinois Revised Statutes, but his belief is unreasonable.

Arson

38 § 20-1.

Aggravated arson

38 § 20-1.1.

(a) A person commits aggravated arson when, in the course of committing arson, he knowingly damages, partially or totally, any building or structure, including any adjacent building or structure, and:

(1) He knows or reasonably should know that one or more persons are present therein; or

CRIME INDEX/CRIME RATE DATA

CRIME INDEX/CRIME RATE DATA

Caution should be exercised when reviewing and using these data. The many social factors related to crime and a community's residential population — used to calculate the crime rate — must be considered when making statistical comparisons. A community may have a small residential population but a large moving population because of a substantial number of manufacturers, motels, etc., within its jurisdiction. The large moving population attracts criminal behavior that occurs within the small jurisdiction and must be reported by the law enforcement agency. The crime rate calculation does not compensate for a moving population. The statistics can make it appear that crimes are committed by community residents when this is not necessarily true.

The Crime Index/Crime Rate Comparison Report is in alphabetical order by county. To determine which county a particular agency may be located, refer to the Law Enforcement Employees Report in Section VI.

BUREAU OF THE CENSUS

STANDARD METROPOLITAN STATISTICAL AREAS

A Standard Metropolitan Statistical Area (SMSA) includes a city of more than 50,000 and the county in which the city is located, plus other cities which exhibit strong ties with the city. The county sheriff's office is also included for crime reporting purposes.* Two of the SMSAs overlap with Iowa and Missouri. Areas outside of Illinois that are included in an SMSA are not represented in the statistics presented here.

SMSA Summary

The estimated population of core cities and suburban areas — the two regions that comprise the SMSAs — accounts for 81.0 percent of the state population. The total SMSA index crimes account for 91.8 percent of the Illinois Crime Index.

SMSA Core Summary

A core city is within an SMSA and has a population of 50,000 or more inhabitants. The "twin central cities" of certain SMSAs have combined populations of 50,000 or more inhabitants and are considered together as a core city.*

The inhabitants of core cities represent 40.5 percent of the state's population and 50.0 percent of the SMSAs' population. Core cities account for 63.4 percent of the Illinois index crimes and 69.1 percent of the total SMSA index crimes.

SMSA Suburban Summary

A suburban area consists of cities and towns with 50,000 or less population, including the counties which are within the SMSA. The county sheriff's office is included in the suburban area.*

Suburban areas lie outside core cities and are bounded by the SMSA lines. The inhabitants of suburban areas represent 40.5 percent of the state's population and 50.0 percent of the SMSAs' population. Suburban areas account for 28.3 percent of the Illinois index crimes and 30.9 percent of the total SMSA index crimes.

LAW ENFORCEMENT OFFICERS KILLED

During 1986, five Illinois law enforcement officers were killed by felonious act and one by accident. A brief narrative on the circumstances surrounding each death is presented below:

February

Bloomington Police Department — On February 19, 1986, a 34-year-old patrolman died from a gunshot wound he received nine days earlier. Shortly after midnight on February 10, 1986, a 33-year-old suspect was placed in a cell block after having been arrested by the patrolman for criminal damage to property. Later that night, the patrolman returned to the cell block to obtain additional information for the booking docket. Reportedly, as the officer passed a cigarette furnished by another inmate to the suspect, the prisoner reached through the cell bars, grabbed the officer's .357-magnum service weapon, and shot him once in the throat. The victim had nearly three years of law enforcement experience with the Bloomington Police Department.

April

Chicago Police Department — A 17-year veteran officer was shot and killed on April 3, 1986, upon responding to a man-with-gun call at approximately 3:10 p.m. Wearing plain clothes and driving an unmarked squad car, the officer and his partner were the first to arrive on the disturbance scene. As he was exiting his vehicle, the 48-year-old officer was fatally shot in the head. Following the shooting, his assailant, aged 57, barricaded himself in an apartment with an elderly female hostage. Following nearly three days of negotiations, the suspect released the hostage and surrendered. Investigation indicates that just prior to the officers arrival at the scene, the assailant shot and killed his landlord as a result of a rent dispute.

August

Chicago Police Department — On August 4, 1986, at approximately 10:15 p.m., while at home a Chicago Police Department Sergeant was alerted to an attempted auto theft which had occurred outside his home. The 25-year veteran, along with his son, began a search of the area. A short distance away five offenders were confronted. After the Sergeant identified himself as a police officer and was conducting a protective search, a scuffle broke out; one of the offenders produced a .22-caliber revolver and shot the 54-year-old officer in the chest, fatally wounding him. All five offenders were apprehended and subsequently charged with murder.

October

Chicago Police Department — On September 22, 1986, at approximately 2:15 p.m., members of the Chicago Police Department 24th District Tactical Unit were conducting a surveillance of narcotic sales outside a grammar school. Police officers observed a narcotics transaction and at that time announced that they were officers at which time the suspect fled. The suspect was pursued by two of the officers and when the 28-year-old suspect was captured a struggle ensued. During the course of the struggle, a .45-caliber automatic accidently discharged critically wounding a 39-year-old officer in the chest. The 18-year veteran officer never regained consciousness and died from the gunshot wound on October 4, 1986. The offender has been charged with murder.

November

Illinois State Police — On November 10, 1986, at approximately 3:40 p.m., a 27-year-old Trooper was killed while attempting to apprehend a traffic law violator. Efforts to stop the suspect for a speeding violation resulted in a high-speed chase by officers from three jurisdictions. The Trooper, who had three years of law enforcement experience with the State Police, was outside his patrol unit attempting to stop the suspect when he was struck and killed by the suspect's vehicle. The 17-year-old suspect was arrested and charged with reckless homicide and aggravated fleeing and eluding a police officer.

December

St. Clair County Sheriff's Office — A St. Clair County Sheriff's Office Deputy, age 39, was shot and killed on December 5, 1986, at approximately 7:00 p.m. The officer, along with two other members of the sheriff's office, was working off-duty as a transit security officer when a man was observed boarding a bus with a gun hidden under his shirt. After identifying themselves, the officers attempted to secure the suspect when a scuffle ensued. The 22-year-old suspect managed to escape and the officers pursued him on foot. The victim officer and the suspect subsequently exchanged gunfire, and the officer suffered a fatal gunshot wound. The suspect, also hit by gunfire, escaped; however, he was later apprehended while attempting to obtain medical treatment. The officer had sixteen years of law enforcement experience.

LAW ENFORCEMENT EMPLOYMENT INFORMATION

The employment rate for law enforcement personnel is calculated as follows:

$$\frac{\text{number of employees} \times 1{,}000}{\text{jurisdictional population}} = \text{employment rate}$$

Example:

A department with 60 employees in a population of 51,000 has an employment rate of 1.2 per 1,000 inhabitants.

$$\frac{60 \times 1{,}000}{51{,}000} = 1.2 \text{ per } 1{,}000 \text{ inhabitants}$$

Law enforcement employment rates should not be correlated with index crimes; non-index offenses and the many services performed by the typical law enforcement officer amount to over 80 percent of the officer's workload, the details of which usually remain unpublished. Each community should consider all the factors related to the causes of crime and determine the role of the law enforcement department relative to crime and to required services.

The 25,192 part- and full-time sworn officers in 1986 account for 84.3 percent of the police department work force. The 1986 employment rate for sworn employees of police departments is 2.7 per 1,000 inhabitants. The 4,701 civilian employees comprise 15.7 percent of the police department work force, with an employment rate of .5 per 1,000 inhabitants.

The 3,319 part- and full-time sworn officers in 1986 account for 71.8 percent of the sheriffs' offices work force. The 1986 employment rate for sworn employees of sheriffs' office is 1.5 per 1,000 inhabitants. The 1,304 civilian employees comprise 28.2 percent of the sheriffs' offices work force, with an employment rate of .6 per 1,000 inhabitants.
